

REMARKS

This application is a continuation application of U.S. Patent Application Serial No. 09/944,894. Claims 35-38 are amended. Claims 1-34 and 39-63 are cancelled. Claims 64-81 are added. Claims 35-38 and 64-81 are in the application for consideration.

Amendments to the Specification and Abstract are made to bring this application into conformity with the immediate patent 09/944,894 application. Each of the Title, Abstract and Specification amendments were entered in the 09/944,894 application. Accordingly, entry of these amendments in this application is also warranted.

This application contains amended independent claims 35 and 37. Such are patterned after allowed independent claims 35 and 37 of U.S. Patent Application Serial No. 09/944,894, but recite the implanting of at least one dopant. The claims are otherwise of similar scope and include analogous amendments as required by the Examiner for allowance in the 09/944,894 application. Accordingly, such claims should be allowed.

Applicant's dependent claims should be allowed as depending from allowable base claims, and for their own recited features which are neither shown nor suggested in the cited art. Action to that end is requested.

This application is believed to be in immediate condition for allowance, and action to that end is requested.

Respectfully submitted,

Dated: 7-29-03
